

SUMMARY

«Repetition in Sophocles' *Electra* 67/69, 375/9, 546/7, 903/6:

A Reconsideration»

In this article I want to reexamine some cases of repetition in Sophocles' *Electra* already surveyed by Prof. Easterling in *Hermes* 101(1973) pp. 26-27 [πατρώα / πατρῶον (67/69), γόων (375/9), γνώμην / γνώμης (546/7), ὄμμα (903/6)]. Thus, by adding some minor points and adjustments to Prof. Easterling's considerations, I hope to contribute some points of my own to the confirmation of her arguments.
